

<https://applelives.com/install-apache-tomcat-9-mac-os-x.html>

1. Download Tomcat from the official website (tomcat.apache.org), select Tar.gz format under the Core section
2. Extract the Tomcat to directory: `/Library`, in order to facilitate the use, rename the folder to `"Tomcat"`
3. Open Terminal, modify folder permissions

```
pwd
```

```
/Library/Tomcat
```

```
sudo chmod 755 bin/*.sh
```

4. Press the Enter key, then you will be prompted for a password, enter the administrator password. Then continue with the following command to open the tomcat service

```
/Tomcat/bin
```

```
sudo sh bin/startup.sh
```

```
sudo sh bin/shutdown.sh
```

```
pwd
```

```
/Library/Tomcat
```

nb pour accéder à la gestion graphique de tomcat j'ai édité le `/conf/tomcat-users.xml`

```
<tomcat-users xmlns="http://tomcat.apache.org/xml"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
  xsi:schemaLocation="http://tomcat.apache.org/xml tomcat-users.xsd"
  version="1.0">
<role rolename="manager-gui"/>
<role rolename="admin-gui"/>
<role rolename="manager-script"/>
<user username="admin" password="admin" roles="manager-gui,admin-gui,manager-script"/>
</tomcat-users>
```
