HTML & CSS

Cours du 27 novembre 2018

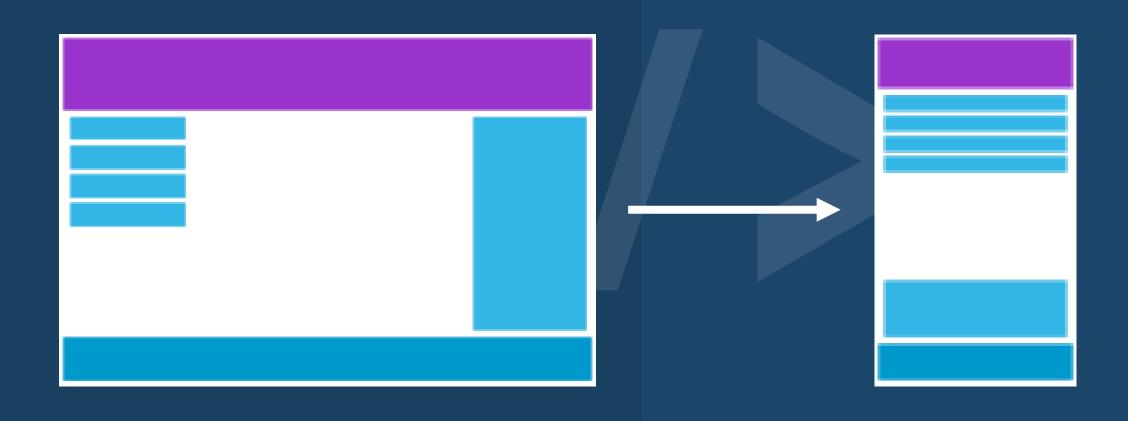

PLAN DU COURS

- Introduction
- Le HTML
- Le CSS
- Bootstrap
- Les bonnes pratiques
- Mise en production
- Initiation à la modularisation ?

OBJECTIFS DU JOUR

- Le responsive
- Les transitions
- Création de modules
- Correction TP2

RESPONSIVE

RESPONSIVE

Le responsive est possible grâce au « Media Queries »

Si la condition est vrai, le css est alors appliqué

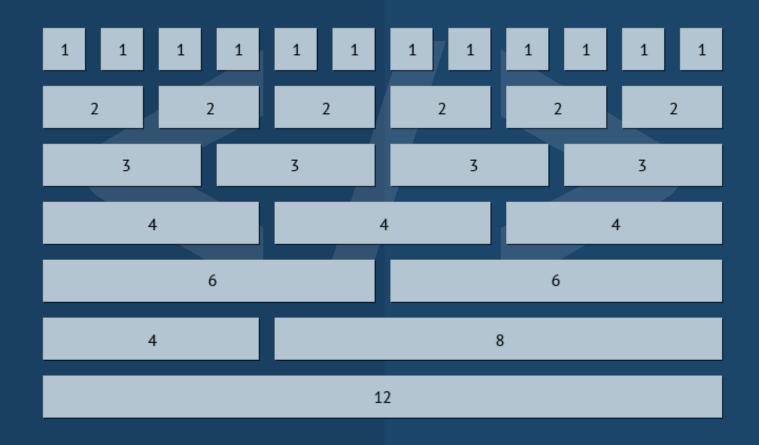

```
.section{
  width: 50%;
@media only screen and (max-width: 600px) {
  .section{
    width: 100%;
```

RESPONSIVE — MOBILE FIRST

Afin de permettre un rendu du site plus rapide sous mobile, il est d'usage d'intégrer le CSS en premier lieux pour les petites résolution et ensuite pour les grandes résolutions

```
//mobile
.section{
  width: 100%;
@media only screen and (min-width: 600px) {
 // + de 600px
  .section{
    width: 50%;
```

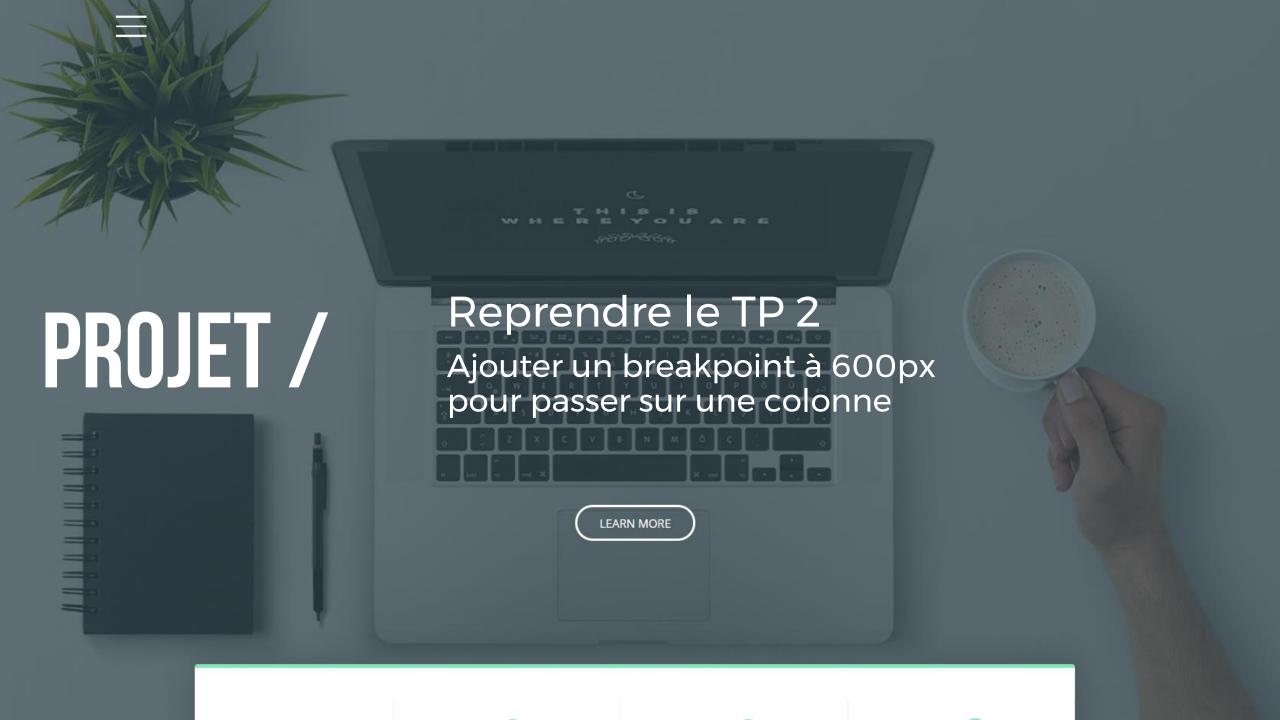

SYSTÈME DE GRILLE

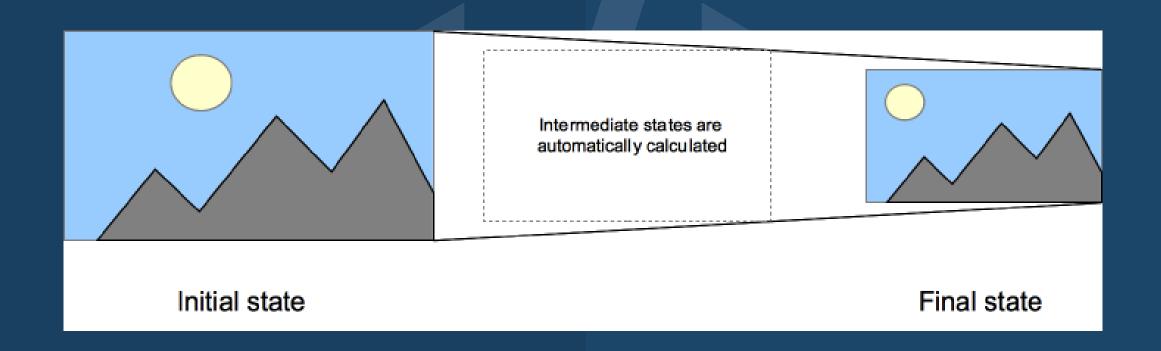

https://codepen.io/anon/pen/rQKeBB

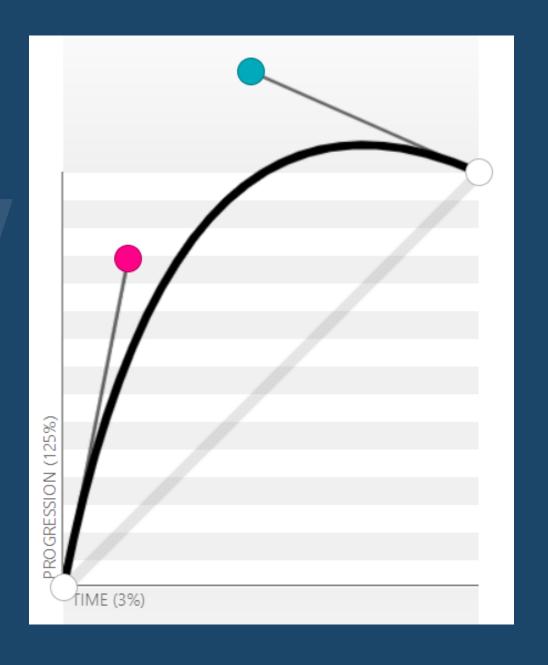

BREAKPOINTS COURANTS

```
/* Extra small devices (phones, 600px and down) */
@media only screen and (max-width: 600px) {...}
/* Small devices (portrait tablets and large phones, 600px and up) */
@media only screen and (min-width: 600px) {...}
/* Medium devices (landscape tablets, 768px and up) */
@media only screen and (min-width: 768px) {...}
/* Large devices (laptops/desktops, 992px and up) */
@media only screen and (min-width: 992px) {...}
/* Extra large devices (large laptops and desktops, 1200px and up) */
@media only screen and (min-width: 1200px) {...}
```

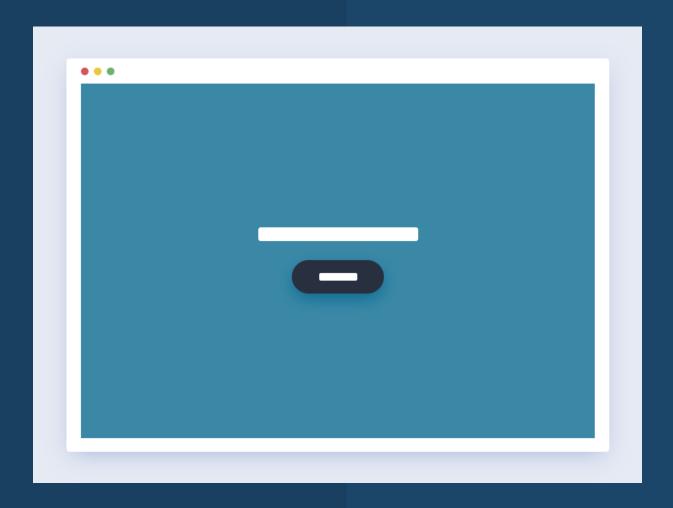

Les transitions permettent de contrôler la vitesse d'animation lorsque des propriétés CSS sont modifiées.

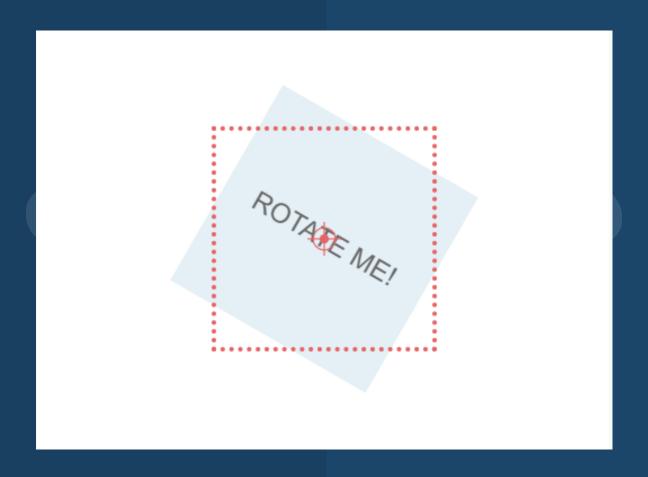

```
//css
.btn {
   padding : 10px;
  background : #fff;
   border : 1px solid black;
.btn:hover {
   transform : scale(1.1);
```

```
//css
.btn {
   padding : 10px;
   background : #fff;
   border : 1px solid black;
   transition: all ease 0.3s;
.btn:hover {
   transform : scale(1.1);
```

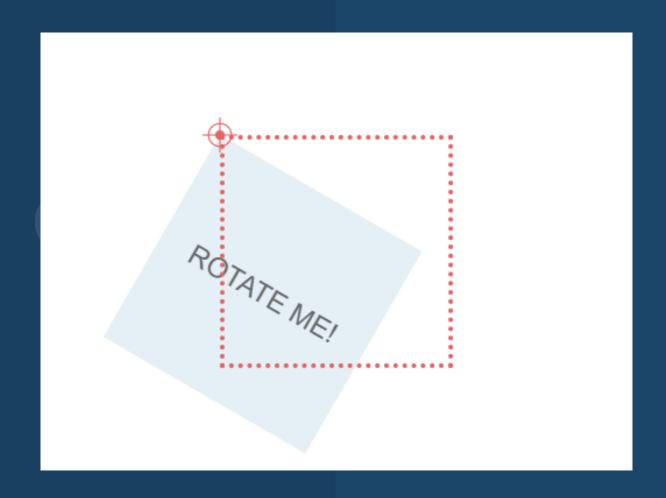

```
//css
transition: ction> <delay>;
Property: <a href="https://developer.mozilla.org/fr/docs/Web/CSS/Liste">https://developer.mozilla.org/fr/docs/Web/CSS/Liste</a> propri%C3%A9t%C3%A9s CSS anim%C3%A9es
timing-function: <a href="https://developer.mozilla.org/fr/docs/Web/CSS/transition-timing-function">https://developer.mozilla.org/fr/docs/Web/CSS/transition-timing-function</a>
```

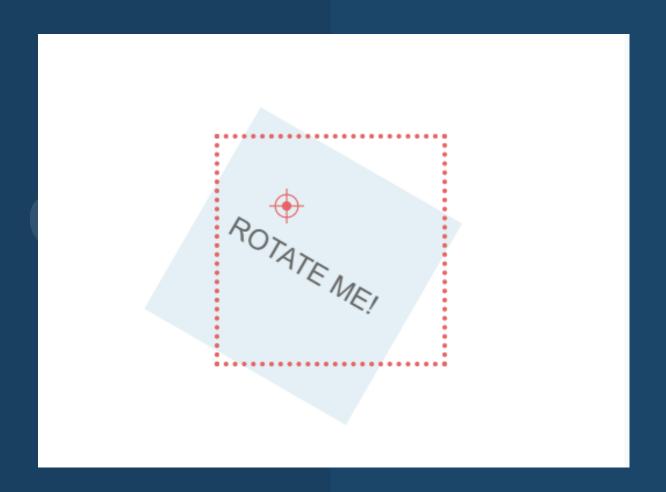

https://developer.mozilla.org/fr/docs/Web/CSS/transform

transform-origin: center;

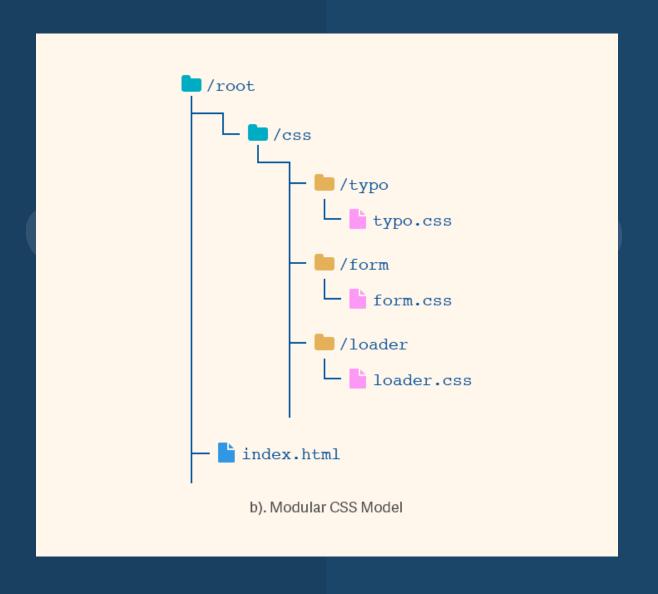

transform-origin : top left;

transform-origin: 50px 50px;

CREATION DE MODULES

CREATION DE MODULES

```
style.css *

/* Project Stylesheet */

@import url("typography.css");

@import url("form.css");

@import url("loader.css");
```
